

Untitled

I am looking for someone with an engineering/signal processing background and an interest in rehabilitation research. I have a lot of existing human biologic signal data (EEG and wearable sensors) and will continue collecting more. The postdoc would be able to analyze existing data and create their own questions prospectively, leading to an efficient and productive post-doctoral period.

Beth A. Smith, PT, DPT, PhD
Assistant Professor of Research
Division of Biokinesiology and Physical Therapy
University of Southern California
1540 Alcazar Street, CHP 155
Los Angeles, CA 90089-9006
Office CHP 148D, (323) 442-4072
