

A postdoctoral position is available in the Zilkha Neurogenetic Institute at the University of Southern California.

We are seeking a highly motivated individual to join the Chang Lab in studying mechanisms regulating neuronal communication, and how changes in some of these fundamental processes contribute to neurological disorders. Candidates with experience in cell biology, neurobiology, and/or molecular biology are invited to apply. Preference will be given to candidates with expertise in *Drosophila* genetics (we use *Drosophila* as a model system), confocal imaging, and/or electrophysiology. Candidates are expected to be highly motivated, independent, and creative. For more information, see <http://ngp.usc.edu/browse-faculty-a-z/profile/?faculty-profile=127>.

Karen T. Chang, PhD  
Associate Professor  
University of Southern California  
Zilkha Neurogenetic Institute and  
Dept. of Physiology & Neuroscience
