

A postdoctoral position is available in the Zilkha Neurogenetic Institute at the University of Southern California.

We are seeking a highly motivated individual to join the Bonnin Lab in studying mechanisms regulating fetal brain development, and how maternal and environmental factors such as stress or infections alter this process and contribute to neurological disorders later in life. Candidates with experience in neurobiology, and/or molecular biology are invited to apply. Preference will be given to candidates with expertise in using mice as a model system, confocal imaging, some biochemistry . Candidates are expected to be highly motivated, independent, and creative. For more information,
